**A TRACTOR EQUIPPED WITH A TIMBER LOADER AND JAK-200K TREE SHEAR MAKES CLEARING ENERGY WOOD EASY, FAST AND EFFORTLESS.**

Developed for heavy use, JAK-200K cuts the wood to be harvested neatly and precisely at the desired point from ground level. JAK-200K also cuts trees efficiently up to 20 cm (7,8 in) thick trunks, which makes it very versatile.

With the JAK-200K's wide 600 mm (23,6 in) opening, several smaller trees can also be grabbed and cut at once if necessary. Reliable and easy-to-use JAK-200K makes wood handling effortless. If necessary, the cutting blade can be removed, in which case the tree shear acts as a normal wood grapple.
